6400	217	227	10
6900	N/A	207	N/A

This data was collected using a dynapack dynamometer with a trained TMS technician overseeing the process. A stock 1998 E36 M3, as in no modifications made was used for testing. Mobil 93 octane fuel was used and conditions were not in any way varied between each dyno run. Each Dyno may yield different results. Results should be used as a comparison on the same dyno.
